### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Benton Duffett, Jr. on January 26, 2005. The instant amendment serves to eliminate the redundant dosing apparatus feature of claim 2 and to clarify that the claimed method uses a dosing apparatus with the specific features as amended below.

The application has been amended as follows:

In the claims:

Claim 2 has been cancelled.

Claims 1 and 6 have been amended as follows:

1. A wood chip screening method comprising:

separating, in a separating apparatus, pin chips from a quantity of chips that are to be led to a subsequent process,

**providing a dosing apparatus comprising a rotatable device having a plurality of sections of adjustable size, and said rotatable device is adapted to adjust at least one of the rate of rotation of said device and the size of said sections to control said desired amount of said pin chips and said desired rate of**

**speed at which they are dosed among the chips that are to be led to the subsequent process.**

dosing a desired amount of the separated pin chips **with the dosing apparatus** at a desired rate of speed among the chips that are to be led to a subsequent process so that a share of dosed pin chips relative to a total amount of chips does not exceed a desired value, while simultaneously directing pin chips in excess of said desired amount to a location different than said chips to be led to a subsequent process ~~wherein said separated pin chips are led to a dosing apparatus, and said dosing apparatus comprises a rotatable device having a plurality of sections of adjustable size, and said rotatable device is adapted to adjust at least one of the rate of rotation of said device and the size of said sections to control said desired amount of said pin chips and said desired rate of speed at which they are dosed among the chips that are to be led to the subsequent process.~~

In claim 6, fourth line from the end, the language "**rotatable**" has been inserted between "said" and "device".

***Conclusion***

Any references not explicitly discussed above but made of record are considered relevant to the prosecution of the instant application.
